☎ +33 6 69 56 61 88 ✉ [isprokin@gmail.com](mailto:isprokin@gmail.com) 🏠 <https://iprokin.github.io> 🌐 <https://github.com/iprokin>  
Russian national with French visa and work permit.

**EXPERTISE** Machine Learning, Statistics, Computer Science, Probability Theory, Computational Neuroscience.

## EDUCATION

**Ph.D. Computational Neuroscience** 2013 Oct.-2016 Dec.  
INRIA Rhône-Alpes Villeurbanne, France

**M.Sc. Physics** (GPA: 4.63/5) 2011-2013  
Lobachevsky State University of Nizhny Novgorod (UNN) Nizhny Novgorod, Russian Federation

**B.Sc. Physics** (GPA: 4.1/5) 2007-2011  
Lobachevsky State University of Nizhny Novgorod (UNN) Nizhny Novgorod, Russian Federation  
Courses included: Computational Methods, Dynamical Systems, Probability Theory, Calculus, and Linear Algebra.

## EXPERIENCE

**Data Scientist** / 2018 Jan.-present Dataswati / Maissy Palaiseau, France

- Predictive models for unevenly sampled time-series with uncertainty quantification (Python).
- Built automated data pipeline: from raw data to automated cross-validation based feature selection to predictions.
- Set up collaborations with academic researchers at INRIA.

**Independent Researcher** / 2017 Jan.-2017 Dec. Self-Employed / Paris, France

- Researched synaptic plasticity exposed to randomized input patterns using Monte-Carlo numerical simulations.
- Bitcoin price prediction & betting bot; including uncertainty quantification (Python/sklearn/scipy/selenium).

**Ph.D. Research** / 2013 Oct.-2016 Dec. INRIA Rhône-Alpes / Villeurbanne, France

- Developed a Data-Driven Mathematical Model which explained the dependence of synaptic learning on the activity of neurons and experimental conditions. See <https://github.com/iprokin/Cx-Str-STDP>.
- Worked with various experimental and synthetic datasets: Data Cleaning, Parsing, Transformation and Modeling.
- Numerical Stochastic Simulations of Differential Equations, Parameter Optimization, Sensitivity Analysis.
- Python for Data Analysis (NumPy, SciPy, PANDAS, sklearn, and matplotlib) and Numerical Optimization (PyGMO); Numerical Integration in FORTRAN95 interfaced with Python using f2py (x100 faster than Python+SciPy+NumPy).
- 2 scientific publications (one in *eLife*, top 10% journal in biology/neuroscience), 2 submitted.

**Research Internship** / 2013 July-Aug. RIKEN Brain Science Institute / Saitama, Japan

- 3-D reconstruction of neuronal spines from a stack of two-photon microscopy images in MATLAB.

**Graduate Research** / 2011-2013 Institute of Applied Physics / Nizhny Novgorod, Russian Federation

- Processing 64-dimensional time-series data recorded from neuronal cultures grown on multi-electrode arrays.
- Developed a method for graph reconstruction from the time-series data generated by graph's nodes.
- Time-series correlation and its statistical significance in C++; data manipulation/visualization in MATLAB.

**Undergraduate Research** / 2009-2013 UNN / Nizhny Novgorod, Russian Federation

- Solved numerically Differential Equations based model of a Neural Network with a customized Runge-Kutta in C++.
- 2 international scientific publications describing the model of interacting neurons and an adaptive synapse.

## INDEPENDENT PROJECTS

- Halite II AI Programming Challenge (top 3%). [https://halite.io/user/?user\\_id=2559](https://halite.io/user/?user_id=2559).
- Machine Learning powered RSS reader, built with Python and Naive Bayes approach with web-UI (CSS/HTML/JavaScript/Python). <https://github.com/MLdog/nayesdog>.
- Py\_XPPCALL: Python interface to XPPAUT. [https://github.com/iprokin/Py\\_XPPCALL](https://github.com/iprokin/Py_XPPCALL).
- PokerC, Poker Odds Calculator (Haskell). <https://github.com/iprokin/pokerc>.
- Haskell parser of Kospi market data from UDP packets in pcap file. <https://github.com/iprokin/pcapKospi200>.

## SKILLS

- OS: GNU/Linux and OS X (4 years), FreeBSD (3 months), and Windows (14 years).
- Technologies: Python (including SciPy, NumPy, PANDAS, and sklearn) (>40000 SLOC<sup>1</sup>), Fortran 90/95 (>3000 SLOC), bash/zsh (>2500 SLOC), C/C++ (>15000 SLOC), MATLAB/Octave (>25000 SLOC), Haskell (>5000 SLOC), HTML, CSS, LaTeX, SQL; familiar with InfluxQL, XPPAUT, NEURON, NEST, and LabView.
- Languages: Russian (native), English (fluent), French (working proficiency).

## AWARDS

- **INRIA PhD Fellowship**, INRIA, Oct. 2013 - Dec. 2016.
- **Best Graduate Research**, UNN, Apr. 2013.
- **The Dynasty Foundation scholarship**, Jan.-June 2013. One of 40 winners out of 149 applicants.
- **Research Achievements scholarship**, UNN, Jan.-Dec. 2012. Given to 12 out of about 250 students.
- **Best Talk award**, 16th Scientific Conference on Radiophysics, UNN, 15 May 2012. One winner of 14 presenters.
